Profile

A motivated First-Year Artificial Intelligence student at Minya National University, with a growing passion for backend development and database design. I enjoy building efficient, well-structured systems—from web fundamentals (HTML, CSS, JavaScript) to relational databases—and exploring how AI can solve real-world problems. I'm an active newcomer in the ICPC Minia Community, constantly sharpening my problem-solving skills.

Education

Bachelor's Degree in Artificial Intelligence at Minya National University - Faculty of Computers and Artificial Intelligence, Maghagha, Minya September 2025 - Present

Relevant Coursework: Programming (C++, C#), Information Systems (IS), Logic Design, Calculus, Physics, and Problem Solving fundamentals.

Internships

Frontend Web Development Trainee (React JS) at [Information Technology Institute \(ITI\)](#), Minya, Egypt July 2026 - Present

Selected for the intensive 144-hour ITI Summer Code Camp. Focusing on building dynamic Single Page Applications (SPAs) using React JS, modern JavaScript (ES6+), component-based architecture, state management, and API integration.

Programming Fundamentals Trainee (C++) at [Information Technology Institute \(ITI\)](#), Minya, Egypt October 2025 - February 2026

Completed an intensive scholarship program focused on C++ programming fundamentals. Developed a solid understanding of core programming logic, control structures, and memory management, building a strong foundation for competitive programming and complex problem-solving.

Skills

Programming & Frameworks: C++, C#, JavaScript, React JS, HTML, CSS, Object-Oriented Programming (OOP).

Databases: SQL, Entity Relationship Diagrams (ERD), Relational Mapping

Problem Solving & Tools: Competitive Programming, Algorithm Design, Git, GitHub

Soft Skills & UI/UX: Analytical & Scientific Thinking, Team Collaboration, UI/UX Design Principles, Clean Typography.

Projects

University Library Management System (ULMS) • [Linkhttps://github.com/YoussefJo25](https://github.com/YoussefJo25) February 2026 - May 2026

Designed and structured a comprehensive library management system. Defined system actors, functional requirements, and the logical flow for book inventory and borrowing processes.

Personal Portfolio Website • [Linkhttps://github.com/YoussefJo25](https://github.com/YoussefJo25) May 2026 - June 2026

Developed a fully responsive personal portfolio website using HTML, CSS, and JavaScript. Implemented a minimalist UI/UX design, focusing on clean typography, effective use of whitespace, and soft color palettes to showcase projects and technical skills with an optimal user experience.
