

Youssef Abdellatif Kamal Mohamed

Artificial Intelligence Student
z01154790192z@gmail.com | 01040971231 | Maghagha, Minya

Summary

A motivated First-Year Artificial Intelligence student at Minya National University with a solid foundation in software development and programming using C++ and C#. Passionate about building efficient systems, database management with SQL, and exploring AI technologies. Seeking a summer internship to apply my academic knowledge, contribute to impactful projects, and accelerate my professional growth.

Education

Bachelor's Degree in Artificial Intelligence 09/2025 – Present

Minya National University - Faculty of Computers and Artificial Intelligence Maghagha, Minya

Relevant Coursework: Programming (C++, C#), Information Systems (IS), Logic Design, Calculus, Physics, and Problem Solving fundamentals.

Skills

Programming Languages (Competent): C++, C#

Database Design & Management (Competent): SQL, Entity-Relationship Diagram (ERD), Relational Mapping

Soft Skills (Competent): Team Collaboration, Presentation Skills, Analytical Thinking, Problem Solving, Scientific Thinking, Technical Writing

System Analysis & Logic (Competent): Requirements Gathering, System Workflows, Logical Thinking

Projects

University Library Management System (ULMS) 03/2026 – 05/2026

Academic Team Project

- Collaborated with a team of 10 students to design and document a comprehensive library management system. Created detailed system requirements, actor lists, and flowcharts to organize system workflows.

Linear Equations Solver (Cramer & Gauss) 02/2026 – 05/2026

Desktop Application

- Developed a desktop application designed to solve systems of linear equations (2, 3, or more variables) using Cramer's Rule and Gauss Elimination methods. Integrated a graphing feature to automatically generate and display the visual representation for each mathematical problem.

Artificial General Intelligence (AGI) Research & Presentation 11/2025 – 12/2025

Academic Research Project

- Conducted comprehensive academic research and delivered a professional presentation on Artificial General Intelligence (AGI), exploring its future frameworks and potential impact. Received high commendation from faculty for depth of analysis and presentation quality.

Courses

C# Programming & Object-Oriented Programming (OOP) 01/2026 – 05/2026

Taught by Eng. Mohamed El-Mahdi | Online

- Focused on C# syntax, core programming concepts, Object-Oriented principles, and building application logic.

Mastering C++ & Problem Solving Fundamentals 09/2025 – 12/2025

Taught by Eng. Mostafa Saad | Online

- Comprehensive training on C++ programming core fundamentals, memory management, and logical thinking for problem-solving.

Relational Database Design & SQL

02/2026 – 03/2026

Taught by Eng. Ahmed El-Gendy | Online

- Covered relational database fundamentals, designing Entity-Relationship Diagrams (ERD), Relational Mapping, and writing structured SQL queries.

Organisations

ICPC Minia Community

09/2025 – 02/2026

Newcomer Participant (2026)

Minya, Egypt

- Joined the training program for competitive programming, solving algorithmic problems, and sharpening problem-solving skills under the ICPC guidelines.

Languages

Arabic: Native

English: Upper-Intermediate
